GREAT BRITAIN FEELING PRESSURE SCHOOL DAYS MOCILITY NEW PIPEL BY DWIG COMPETITION, ASKS PROTECTION

WITH the United States and Germany breaking into the British markets, a strong movement is under way in the British lakes favoring a protective tariff. British until recomity has been a great exporter of manufactured goods wills also has imported much raw material. Now there is setual fear that americans and Germann are going to undersal her not only in the islands but throughout the empire, in manufactured staples in which British manufacturers have bell almost a market monopoly. The British manufacturers have bell almost a market monopoly. The British are worried.

To obtain a true comparison, tournage, not maney values, remaind 172 personat over 1913 and exports 185 purpora, in memory value, but tunnage of imports for the first eight meeths of this year was less than 30,000,000 compared with 7,053,000 form in 1013; and tournage of exports for August this year is a 3,000,000 compared with 7,053,000 form in 1013; and tournage of exports for August this year was 3,000,000 compared with 7,054,000 form in 2013; and tournage of exports for August this year was 3,000,000 compared with 7,054,000 form in 2013; and tournage of exports for August this year compared with 1,251,000 form and August 1913.

The labest extincted that if all the machinery in the best extinated described of the people described in matters of principle, they change their minds about men whenever they please.

Some people have regretted described described in matters of principle they change their minds about men whenever they please.

to his lights. While newspapers should never be ficile its factories chiefly) was 250,000 in August this year compared with Liviloto tons in August 1913.

It has been estimated that if all the machinery in the blagdum were at work, 500,000 mere people would be smalled that the machinery that is employed are not producing saything the the present averages per hour or per unit of wages. The Guaranty Treat company has been collecting some interesting facts. In some time, American manufacturers are underselling British in England and change from other days when attention to foreign requirements and greater efficiency in selling methods—quits a change from other days when American becometives are selling in Asia and South America below British grices. The British manufacturers are selling in the foreign trade became they were not built that way.

American becometives are selling in Asia and South America below British grices. The British manufacturers say their engines are better than ours, but ours seem to do the business. American wire noils are selling in England at about the prices that the British manufacturers say their engines are better than ours, but ours seem to do the business. American wire noils are selling in England at about the prices that the British manufacturers say their engines are selling in Singland at about the prices that the British manufacturers are selling in England at about the prices that the British market. British labor transless are accountable for much of this difficulty in controlled. American mater tracks are selling in England at prices which the Sritish definit they cannot compare to be provided the prices that the British market. British labor transless are accountable for much of this difficulty in controlled the prices that the British market. British labor transless are accountable for much of the british is to the prices of today are the reactionaries of tomarrow.

American meteor tracks are selling in England at prices with which the Sritish admit they cannot company to t

American motor tracks are selling in England at priors with which the British admit they cannot compete. Amer-ican cars and trucks are dominating the market in British

lance.

In cutlery, always a British specialty, German competition is been and it is said that the Germans are turning only believ goods than before the war. More German piants are being sold in England now than before the war, in the top market, the German pressure is particularly hard, and

States and Scandardia.

Textile methinery and machine tools are in heavy demand, Belgium and China leading.

The effort was readjustments in trade conditions must be waithed most extentily by Americana. El Paso manufacturers and marshants are vitally interested in readering such extellar service to the trade in Mexico that British and Germans will be shut out of El Paso tarritory. The present is already being fell, and El Paso's big drive was stated need too seen. We have irremendant advantages at the moment, and only our own gross seglent could less these near markets to our people. Much depends an politing there first; then it becomes a question of superior service, prompt indivery, watchful adaptation, close pricing, and antisfor-lary credits.

By the way, how about that fool cotton quarantine?

"Rent raisers," says a headline, "spread gloom along Broadway!

The other Sunday, prisoners in the jail were heard sing. "Trust and obey, for there's no other way."

If the team year bet on losse, the game was crooked, of course.

Mexico does not, however, want to trade raw materials for a taw deel. And we don't want her to, either.

Large afreams from little necessary from little account gross and antisfor-large results.

The Eetemal Fight.

PT 15 too hed that west Texas has to maintain a service I burran at Austin and at Washington in order to get nothing more than what is due to this part of the state. are being selfs in England now than before the war. In the
tory markel, the German presents is particularly hard, and
is line this year the British bought in June 1913.

German toys than they bought in June 1913.

The are only one line in which manufacturers are demanding a muteritive tariff. Photographic goods and
chemicals, and dyes, are being sent in from Germany at
pulse which the Entitish brance assert are below the British
cost of profinction. They call the German commercial invarion a "dumping" process and sale government aid,
